

Relieve. Recover. Restore.

As people move away from opioids and NSAIDs they are choosing NovoTHOR® for pain management and healing— with life changing results.

Don't cover up pain

NovoTHOR is a whole body PBM device. Unlike drugs, it treats the source of the pain instead of just hiding it. The treatment takes just 15 minutes and is used in pioneering clinics and hospitals around the world.

It uses red and near-infrared light to treat injuries, reduce pain, relax muscles and joints, and increase blood circulation.

Photobiomodulation

The treatment is called Photobiomodulation or PBM. It has been studied in over 500 RCTs and 4,000 lab studies.

THOR is considered the subject matter expert in PBM by world class institutions, including Harvard, NYU, The Veterans Administration, the US Government, and the United Nations,

Irrationally Committed, meet Obsessively Engineered.

The science of photobiomodulation isn't new. After thirty years of dedicated study, our extensive knowledge of its application and dose-response relationship has culminated in the NovoTHOR Whole-Body Light Pod, a breakthrough device delivering photobiomodulation therapy (PBMT) from head-to-toe.

NovoTHOR embodies our commitment to healing without drugs or surgery, and our mission to design the most effective devices possible. Engineered to exacting standards for dose and wavelength, NovoTHOR produces patient outcomes unmatched by any other device of its kind.
